# BTM
Initial software update steps

1, Power supply: plug adapter, network connection cable (next to the power switch)

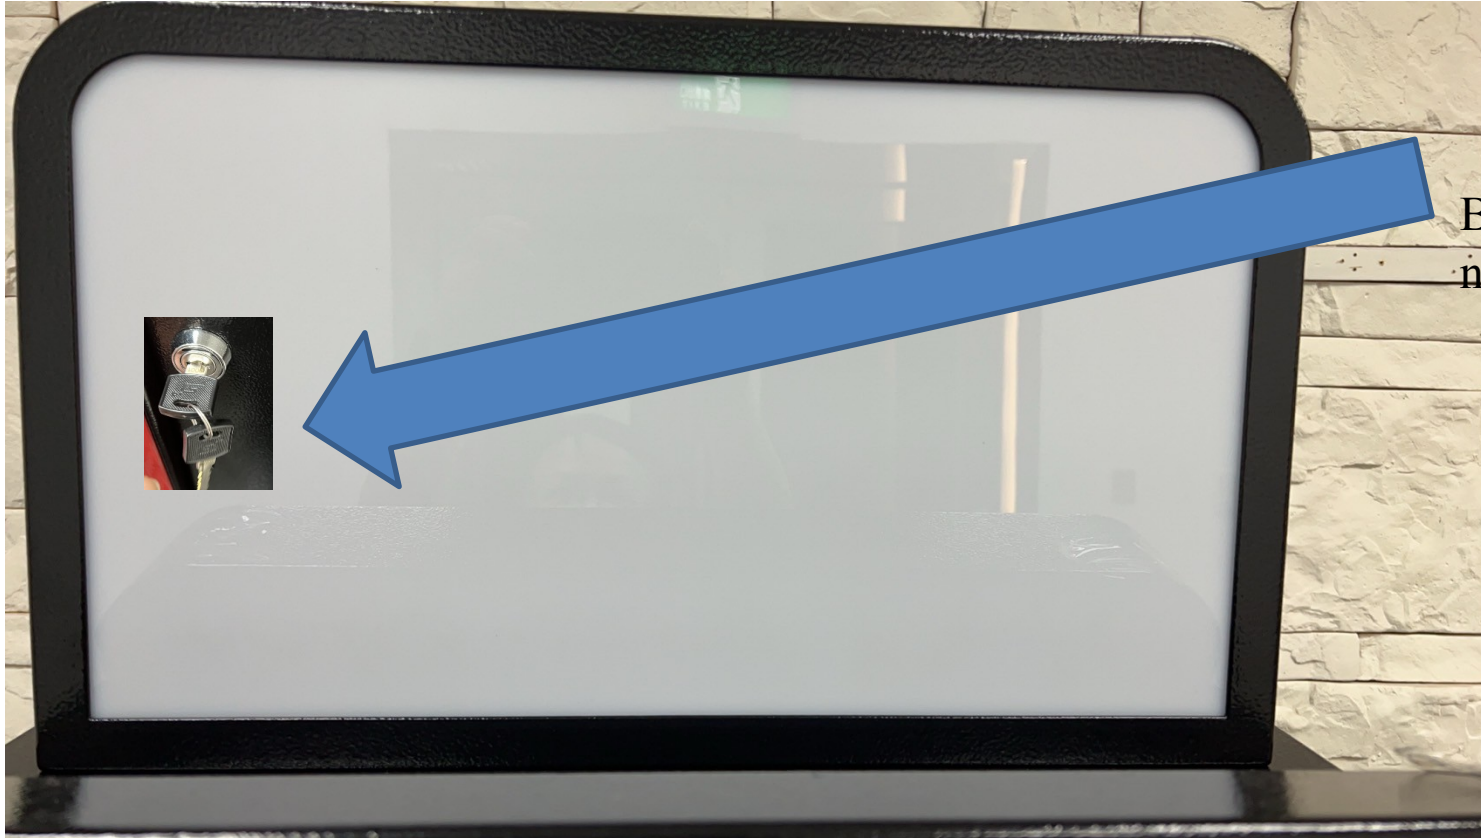

Turn on the main power(to light up)

Below the back of the BTM

network cable

2, Key: Glued to the light box

Because there is customs, the key may need to find the location

3, Key: Open the BTM door
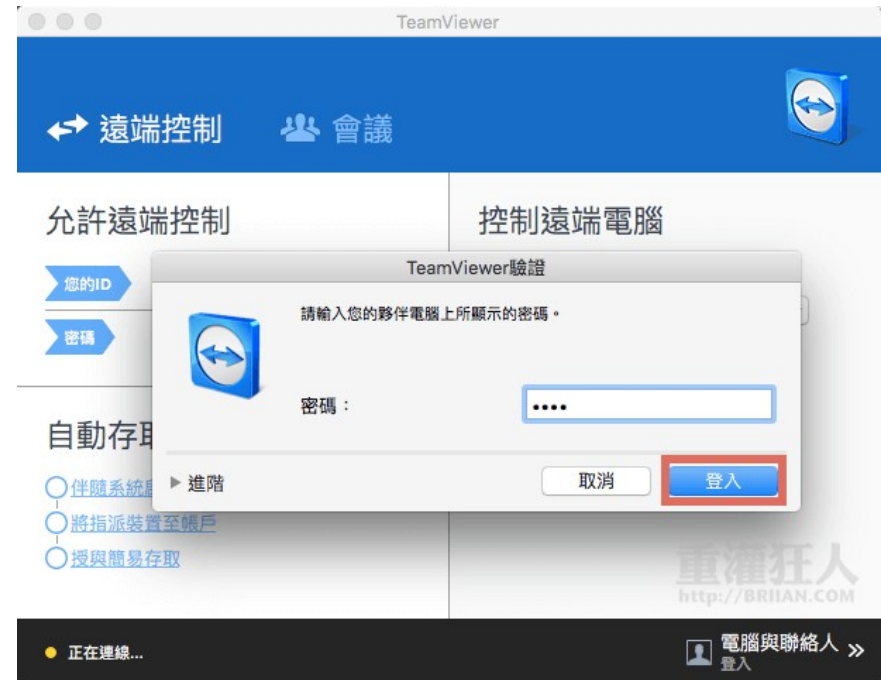

Turn left after inserting the key

There is a push rod under the key, press down, the door will open

4, Both switches of the main power supply must be turned on

5, The computer automatically turns on

6, Automatic login to Windows screen

7, Automate Teamviewer

8, Location ID ,password automatic login

9, Numiner Remote update by software team

Thanks!
